

## **cysmo<sup>®</sup> Data Guard**

# Fully automated darknet monitoring for your corporate clients

With the cysmo<sup>®</sup> Data Guard, you can offer your customers round-the-clock monitoring of company data. This feature from the cysmo<sup>®</sup> Business Suite can be used to check the data of your corporate clients around the clock, i.e. 24/7, for publications in the darknet in a 100 % GDPR-compliant way.

Thanks to modern REST technology and industry standards, the cysmo<sup>®</sup> Data Guard can be integrated with little effort into your IT infrastructure, e.g. an existing customer portal.

The unique white label approach allows the cysmo<sup>®</sup> Data Guard to be customised according to your corporate identity, so that your customers can comfortably use the darknet screening. Whether as a useful supplement to the cysmo<sup>®</sup> Business Suite or as an independent component, the IT security of a company can be actively increased from the outside.

### **An offer for your cyber security strategy:**

- 24/7 security monitoring of company data
- Unique darknet screening
- 100 % GDPR-compliant
- Special white label approach
- State-of-the-art REST technology

**cysmo® Data Guard**

# You and your customers benefit from high data quality

## Digitisation know-how

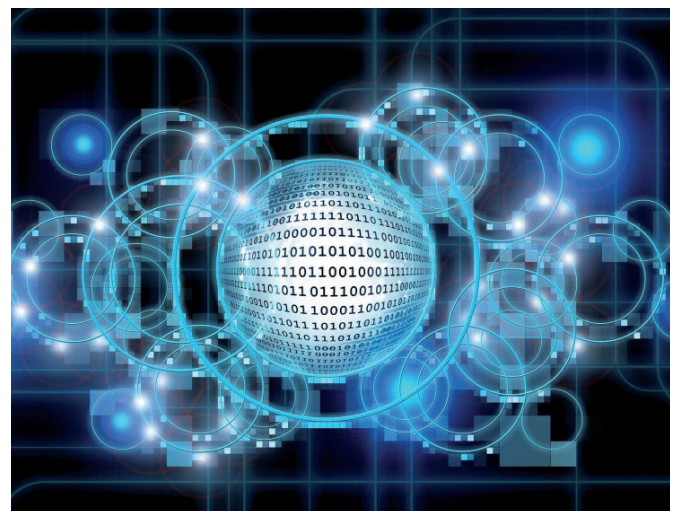

Thanks to the combination of more than 30 years of experience in software development and innovative digitisation know-how, the cysmo® Data Guard stands for reliable software made and hosted in Germany. This gives your corporate customers real added value and also makes you a step ahead of the competition. In order to maintain your customers' trust regarding sensitive data topics, thanks to the latest hashing technology cysmo® does not receive plain text data, so that you or your customers retain data sovereignty at all times.

	Stand-alone	Integration
Data sovereignty	✘	✔
DSGVO-konform?	✘	✔
Targeted customer journey	✘	✔
One-time login	✘	✔
Automatic data detection	✘	✔
Corporate design	✘	✔

Advantages of an integration solution compared to stand-alone operation

## Real darknet competence

By employing an exclusive service provider, machine learning technology and methods of artificial intelligence, the cysmo® Data Guard is able to read not only the structured publications in the darknet but also the unstructured and hard-to-read raw data and dumps.
